

Changes to Pool Fencing Laws December 1st 2010.

The Queensland Government has introduced new pool safety laws aimed at further reducing the incidences of drowning and serious immersion injuries of young children in swimming pools. From 1 December 2010, pool safety certificates are required when selling or leasing a property with a pool. These laws affect new and existing pools with penalties up to a maximum of \$18,500.

Your 7 step action plan to ensure you pool barrier complies.

- ✓ Ensure that the gate has been adjusted to be self closing.
- ✓ Shield or remove climbable objects within 900 millimetres of the pool safety barrier.
- ✓ Trim back branches that a child could climb over the pool barrier.
- ✓ Remove climbable objects from the surrounding area
- ✓ Ensure that the pool safety barrier height is 1200 millimeters from bottom to top.
- ✓ Ensure that adjoining boundary fences do not have climbable rails.
- ✓ Ensure Latest Cardiopulmonary Resuscitation Signage (CPR) Signage adopted by the pool safety council is installed.

Energy Auditing saves client \$3000 Per Month within 6 Weeks.

From conducting an energy audit on a complex The Building and breaking down where the energy was being used. We were able to identify saving of \$3000 per month, and the client was nervous at first but that has changed now.

Zero Carbon Australia Stationary Energy Plan Launch.

This cutting-edge plan, the culmination of over 12 months and thousands of hours of pro bono work by engineers, scientists and postgraduate students, is a collaboration between the climate solutions think tank Beyond Zero Emissions, and the University of Melbourne Energy Institute.

This plan is unique in Australia. It is a detailed and costed blueprint for transitioning our stationary energy sector to 100% renewable energy in ten years. The event was held at the convention centre with Professor Ian Lowe AO, President of the Australian Conservation Foundation as well as

- Matthew Wright, Executive Director Beyond Zero Emissions
- Premier of Queensland, Anna Bligh
- Dr Luis Crespo, General Secretary Protermasolar, Spain
- John Daley, CEO Grattan Institute
- Prof Ove Hoegh-Guldberg, UQ Global Change Institute
- Prof Mike Sandiford, Melbourne Energy Research Institute
- Klaus Langer, CEO Latronics Qld
- Prof John Bell, Faculty of Built, Environment and Engineering QUT
- Larissa Waters, federal senator elect for Queensland

Over 800 people attended the booked out event and This demonstrates on what can be done now to reduce our emissions, with technologies utilised in this plan are commercially available now.

Dr. Martin Blake DBA, MBA, BCC Royal Mail Sustainability.

The Royal Mail annual costs and impacts in real terms are equivalent to:

Enough Emissions to fill 99 Billion party balloons, and Fill 59 Olympic Pools with Diesel.

Road Mileage equivalent to a return trip to Jupiter, landfill waste of 17,410 Transit Vans.

Energy Consumption equivalent to powering 43,731 Houses.
